-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Claims 17-45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/1/05.

Note: Elected claims 22 and 23 depend from non-elected claim 17. Therefore, the Examiner has withdrawn claims 22 and 23.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maguire et al. (US 6953460) in view of Panescu (US 2003/0078509). Maguire et al. disclose an elongated catheter body having proximal and distal ends and a transducer (1030) mounted at or near the distal end of the catheter body, the transducer having a front surface and an opposing back surface, wherein the transducer is positioned to transmit ultrasound energy toward the tissue facing the front surface but not toward tissue facing the back surface. Maguire teaches all of the limitations of the claims except a sensor for sensing location mounted within the catheter near the ultrasound transducer.

Art Unit: 3739

Panescu discloses a similar device and teach that it is old and well known in the art to provide a location sensor to determine the precise location of a device relative to the target tissue. Therefore, it would have been obvious to one of ordinary skill in the art to include the location sensor taught by Panescu on the Maguire et al. catheter so that the precise location of the surgical tool relative to the target tissue can be determined.
